

PACK-MAID® 17-pieces Tool Set in plastic box

The **PACK-MAID**® Packing tool set considerably facilitates the removal of worn-out stuffing-box packings of pumps, agitators, valves etc. – thus, they should be used in very repair- and maintenance facility.

The **PACK-MAID**® Packing tool set consists of an impact resistant plastic box equipped with a foam material insert which holds the most commonly used packing tools. Spare tips, a wrench for tip-replacement and various types of solid shaft packs complete the tool set.

In order to prevent the loss of tools, the foam material insert is furnished with cut-outs which match to the different tool configurations.

With the exception of the box itself, all parts can be supplied individually.
